

BUTTERFLY VALVES

R&D Multiple's Butterfly Valves have been very commonly used in various applications all over the globe for past 3 decades. Irrespective of sizes, pressure ratings, fluids handled, type of operators etc. our Butterfly Valves are the most preferred choice of the discerning customers. We have also kept our valves in tune with the latest technological advancements in materials, manufacturing, pattern making & foundry & operators fields. This has enabled us to offer valves from 50mm. to 3600mm. sizes in pressure ratings 6 to 40bar, in Cast / Fabricated constructions in Cast Iron, Carbon & Alloy Steels, Stainless Steels & also Rubber-lined variety. The types of operators offered are Manual, Electrical, Pneumatic, & Electro-Hydraulic. We also supply large Hydraulically operated Pump discharged valves (HOPD). In short; we provide techno-commercially best solution to any installation in which use of Butterfly Valves is envisaged.

D/F BUTTERFLY VALVE WITH MANUAL GEARBOX

No.	Party Name	Material
1.	BODY	CAST IRON IS 210 GR. FG 260
2.	DISC	SG IRON IS 1865 GR. 500/7
3.	DISC SEAL RING	NITRILE RUBBER
4.	BODY SEAT RING	STAINLESS STEEL AISI 304
5.	CLAMPING RING	STAINLESS STEEL AISI 304
6.	LONG SHAFT	STAINLESS STEEL AISI 410
7.	STUB SHAFT	STAINLESS STEEL AISI 410
8.	SHEAR PIN	STAINLESS STEEL AISI 410
9.	LONG BUSH	STEEL BACKED PTFE
10.	STUB BUSH	STEEL BACKED PTFE
11.	END COVER	SG IRON IS 1865 GR. 500/7
12.	GLAND BUSH	MILD STEEL
13.	SPACER	STEEL WITH ELECTROLESS NICKEL PLATING
14.	'O' RING	NITRILE RUBBER
15.	INTERNAL HARDWARE	STAINLESS STEEL AISI 304
16.	EXTERNAL HARDWARE	CARBON STEEL IS 1367 CL 4.6 / 4
17.	GEARBOX	QUARTER TURN WORM GEAR TYPE
18.	HANDWHEEL	MILD STEEL

ELECTRIC ACTUATOR WITH GEAR BOX OPERATOR.

ROTARY PNEUMATIC ACTUATOR WITH MOR LINEAR ACTUATOR WITH MOR OPTION AVAILABLE.

RUBBER LINED D/F BUTTERFLY VALVE

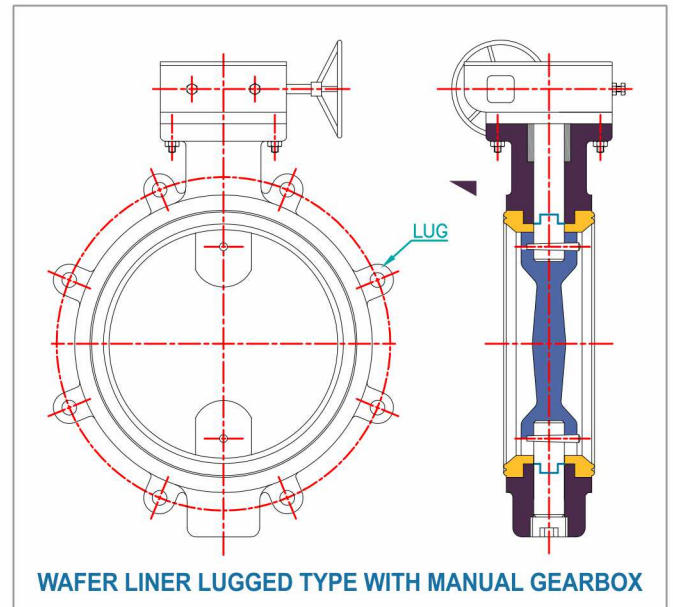

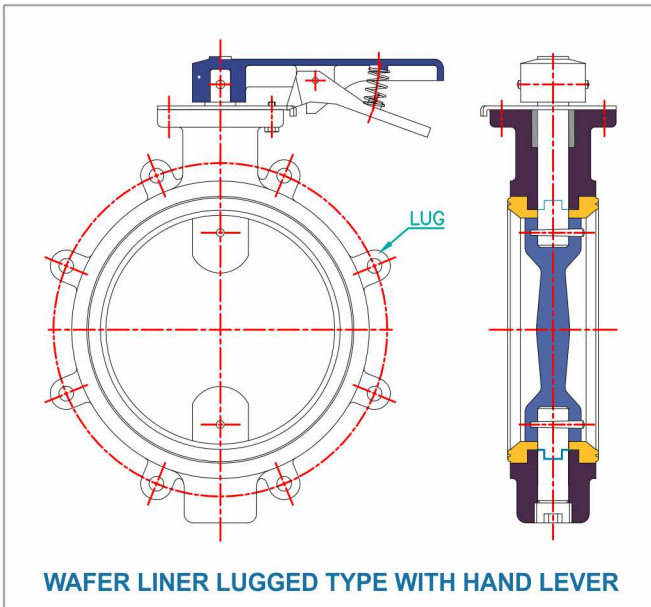

HYDRAULICALLY OPERATED PUMP DISCHARGE VALVE

SALIENT FEATURES OF FLANGED BUTTERFLY VALVES

- Sturdy & robust construction.
- Disc assembly perfectly centered & secured in valve body bore.
- Seat Ring cone finished in-situ.
- Flow through disc ensuring minimum pressure drop.
- Secured Disc-Shaft Connection.
- Cast & Fabricated constructions possible.
- Compliance with: IS 13095, AWWA C504, BS EN 593 standards.
- Manual, Electrical, Pneumatic & Electro-Hydraulic Operators.
- NDE side thrust arrangement.
- Shaft seals comprising of elastomeric 'O' rings & 'Lip seals'.
- Disc seal secured in - between machined grooves in disc & clamping ring making it completely washout-proof.
- Perfection of alignment of components, fine finishing of rubbing surfaces, controlled seal dimensions ensure very smooth operation & less operating torque requirement.
- Electrical / Pneumatic actuator drives optionally available.
- Accessories like Head-stock & Extn. Shafting, Disc Locking options available.

SPECIAL FEATURES : FLANGED BUTTERFLY VALVES

- Flow through disc ensuring minimum pressure drop.
- Disc locking arrangement option available.
- Wide options in : (A) Materials of construction, (B) End Connections, (C) Face to face dimns.
- Shaft bearings not wetted by fluid handled ensuring low frictional torque & long bearing life.
- Concentric, Single, Duo & Tri-eccentric constructions offered for appropriate applications.
- Endurance Life Cycle Testing Carried out for prototype sample sizes as per AWWA C-504 covering all the range of manufacturing.
- Installation with vertical or horizontal shaft possible.

SALIENT FEATURES : LINER VALVES

- Liner locked in precision machined grooves in valve body.
- Sealing ribs on end faces with enough protrusion to ensure drop-tight end face joints.
- Sturdy & long shaft bearings ensuring precise rotation of the disc assembly in the body.
- Double Shaft seal which precludes leakage possibility.
- Sturdy Disc-shaft connection.
- Robust backlash-free Hand Lever mechanism without the possibility of over-travel due to provision of in-built, positive travel limit stops.
- Electrical / Pneumatic actuator drives optionally available.

SPECIAL FEATURES : LINER VALVES

- Optimized liner dimensions ensuring efficient sealing performance.
- Critically controlled interference between the rubber liner & the Disc sealing surface ensuring leak-tightness & lower operating torque at the same time leading to long seal life.
- Stainless Steel Investment cast Disc as a standard scope of supply.

NOTES: 1) All dimensions are in mm unless otherwise specified.

2) Views and dimensions are typical & illustrative. They may change with design modifications.

3) For larger sizes / HOPD dimensions & special requirements, contact our Marketing Dept.

4) Pressure Ratings as per PN 6 / 10 / 16 / 25 & class ratings as per AWWA C-504.
