R&D Multiples delivers 4500mm (180") butterfly valves for overseas power project

R&D Multiples has recently completed delivery of 4 nos of 4500mm (180") butterfly valves for an overseas power project with a manufacturing lead time of approximately 7 months. These valves were fabricated within our factory under strict quality control standards and the following tests were carried out prior to delivery:

- Visual & dimension check as per approved quality plan
- Hydrostatic body & seat test as per API 598
- Functional open-close test with electrical actuator
- Painting & corrosion protection, in accordance with the requirements of the customer

This is one of the largest butterfly valves to have been made in India, and puts us in a select group of companies around the world to have the design & execution capability to manufacture such a size.

About R&D Multiples:

We are one of the leading manufacturers of valves used in industrial applications. Founded over 3 decades ago, we have developed a wide product range over the years. We manufacture valves up-to 4.5 meters size & 40 bar pressure ratings with a wide variety of operators & actuators as drives. The materials offered to suit customer specifications range from cast iron, carbon steel, stainless steel & other corrosion resistant / high strength alloys.
